The file can be imported into a number of applications, Excel, Access, FoxPro as well as many others. Perhaps the easiest way to deal with the file is in an Excel Spreadsheet. You can sort on the district you are interested in and can delete those before and after that you are not interest in mailing.

For those not familiar with how to import a text file into Excel the instructions follow.

Open Excel.

On the File Menu Select Open. You will need to change the Look in: location to wherever you saved the text file.

Change your file type to Text File and locate the file you want to use and click on Open.

Excel will know that the file is not in an Excel format and should start the Text Import Wizard. Make sure that the Delimited button is click and click on the next button.

**Text Import Wizard - Step 1 of 3**

The Text Wizard has determined that your data is Delimited.  
If this is correct, choose Next, or choose the data type that best describes your data.

Original data type

Choose the file type that best describes your data:

☒ **Delimited:** Characters such as commas or tabs separate each field.

☐ **Fixed width:** Fields are aligned in columns with spaces between each field.

Start import at row:  File origin:

5	BURROUGHS, CRAIG A	NEW ALBANY-C	340	02/07/2006	B1

Buttons: Cancel, < Back, **Next >**, Finish

In step 2 make sure the Tab delimiter is selected and click on next.

**Text Import Wizard - Step 2 of 3**

This screen lets you set the delimiters your data contains. You can see how your text is affected in the preview below.

**Delimiters**

☒ Tab ☐ Semicolon ☐ Comma  
☐ Space ☐ Other:

☐ Treat consecutive delimiters as one

Navigation buttons: < Back Next > Finish

Because of conversion of data type problems you want to tell Excel to read the fields in as text. To do this make sure the first column is highlighted and move the slider button to the far right.

**Text Import Wizard - Step 3 of 3**

This screen lets you select each column and set the Data Format.

'General' converts numeric values to numbers, date values to dates, and all remaining values to text.

After moving the slider to the far right, hold down the Shift key and click on the last column so everything you can see is selected.

Make sure that the Text button is clicked

And Click on the finish button.

The file has been exported into Excel.

Now save the file as an Excel Spreadsheet.

The Franklin County Board of Elections can not supply telephone support for using the absentee data files. However an excellent web site where you can find information on doing a Word Merge can be found at <http://word.mvps.org/FAQs/MailMerge/>
